

HEProAI Activity 3: Mentoring Recommendations

Data-Driven Intervention Strategies

Harini Muthurengan

February 2026

1 Overview

Following the K-Means clustering analysis, four distinct student archetypes were identified. This document outlines the prescriptive actions required to move students toward the **Blue (Excellent)** category.

2 Intervention Strategies by Cluster

Cluster 0: Academic-Centric (High APS, Low CRS)

Strategy: Career Integration

- Mandatory enrollment in "Career Roadmap" seminars.
- Introduction to industry networking sessions to increase Career Readiness Score (CRS).

Cluster 1: High-Stress Achievers (Critically Low WWS)

Strategy: Wellness Stabilization

- Referral to Mental Health support for immediate burnout prevention.
- Implementation of a "flexible deadline" policy to recover Wellness scores.

Cluster 2: Global At-Risk (Low Scores in All Domains)

Strategy: Intensive Support

- Assignment of a dedicated Human Mentor for daily check-ins.
- Remedial sessions focusing on both Academic and Productivity habits.

Cluster 3: Productivity Powerhouse (High PTMS)

Strategy: Leadership Grooming

- Appointment as "Peer Mentors" to utilize high productivity for group benefits.
- Advanced project placement to maintain engagement levels.

3 Conclusion

By applying these targeted recommendations, the HEPPro AI+ system ensures that mentoring resources are allocated where they will have the most significant impact on student success.
